CHAPTER I. PREFACE

According to the data of Department of Cooperatives and Small & Business Enterprises of North Sulawesi, there are 54,964 units of total micro, small, medium enterprises and cooperatives in North Sulawesi which consists of 33,867 units of micro enterprises, 16,722 units of small enterprises, and 2,375 units of medium enterprises. The amount of assets owned is Rp. 4,828,423,000,000 consisting of Rp. 3,277,000,000,000 of micro enterprises, Rp. 1,596,216,000,000 of small enterprises and Rp. 2,905,131,000,000 of medium enterprises. The amount of turnover is Rp. 5,913,216,000,000 which consists of micro enterprise by Rp. 353,582,000,000, small enterprises by Rp. 3,283,776,000,000 and medium enterprises by Rp. 2,276,496,000.

There are 165,482 manpower which consists of 34,056 people of micro enterprises, 57,192 people of small enterprises, and 74,234 people of medium enterprises. The low level of education and bad management of the entrepreneurs bring impacts to various problems to their business such as:

1. Lack of access and market share expansion
2. Lack of access to financing sources, especially banks
3. Limited access to information
4. Lack of technology utilization
5. Lack of ability in organizational management

These problems will surely influence the competitiveness of the enterprises. The new era of economy will no longer acknowledge the boundaries among the countries. Also supported by the rapid development of information and communication technology will lead to the continuity of the flow of goods like flowing water from upstream to the valley. That is what will happen in the future. Ability upgrade is needed in order to be able to produce products that are highly competitive to face the era of globalization and upcoming challenges which known for democratization, decentralization and autonomization.

Democratization is characterized by freedom of thought, speech and action. In this era of democratization, the entrepreneurs and businessmen are required to always be innovative and creative and be able to adapt to the environment and autonomization era that each of these enterprises obtains different treatment according to the capacity of the area in where they were established.

CHAPTER II. RESEARCH METHODOLOGY

This research was conducted in North Sulawesi using case study in two cities, Manado and Tomohon. The research method used is survey method by examining the situation of income, cost and profit of micro, small, medium enterprises and cooperatives with 5 (five) respondents each so the total respondents of Manado is 15 and also the same for Tomohon. Primary data of the respondents consists of output data, assets, capital, type of business, labor, production, income, financing issues, profit, business management system and secondary data consisting of regional condition, population, type of business, communication and technology utilization.

The data were processed by using Financial and Economic Method, Analysis Model, SPSS and Balance Sheet Analysis Method.

Other costs consists of transportation cost by Rp. 50.000 per month (Rp. 600.000 per year), electricity charges by Rp. 100.000 per month (Rp. 1.200.000 per year), phone charges by Rp. 50.000 (Rp. 600.000 per year), water charges by Rp. 100.000 per month (Rp. 1.200.000 per year), variable cost by Rp. 13.521.000 per month, fixed cost by Rp. 13.859.438 per month and production cost by Rp. 7.860.000 per month (Rp. 93.600.000 per year).

Advantages and Disadvantages of Micro Enterprises in Manado:

1. Souvenirs Shop
   Advantage: The business is located in strategic area nearby the downtown and the products come from various regions with different shapes and sizes.
   Disadvantage: Lack of capital in business expansion and lack of professional business management, for example, dusty display products.

2. Tofu and Fermented Soybean Business
   Advantage: The stock and order rate are always safe and streamlined and the soy milk has many customers because of its freshness and known for nonpreservatives.
   Disadvantage: The production process is still manual and can only be produced in a small capacity and the products are sold by foot every morning

3. Another Souvenir Shop
   Advantage: The products has various interesting shapes from small to large, the products are often requested by the government to be displayed in various exhibitions and the business owners are often hired to be souvenirmaking instructors who train craftsmen from other regions.
Disadvantage: Lack of capital in business expansion and there is still often a problem the acquisition of raw materials because it is still ordered in the area of Central Sulawesi.

4. Herb Beverages Business
Advantage: The business already has official permission from the Ministry of Health, the products has a distinctive flavor that attracts many customers and the main raw ingredients are quite easy to obtain.
Disadvantage: The package bottle and the white ginger (one of the main raw materials) still have to be ordered in Java, and the products that are sold in the store are generally still sold in the form of “deposited then sold.”

5. Grocery Store
Advantage: The business is located in strategic location nearby to several restaurants so the sale of mineral water runs well.
Disadvantage: Lack of capital in business expansion and lack of professional business management.

The advantages and disadvantages of small enterprises in Manado:

1. Tofu and Fermented Soybean
   Advantages: the product has the good taste that attracts many customers
   Disadvantages: the production process is still manual so the production capacity is still small that sometimes have not been able to fulfill customer’s order and lack of capital in business expansion

2. Cassava Chips Business
   Advantages: the products has known for its good taste and wide marketing, and the raw materials are easy to obtain.
   Disadvantages: small capacity of production, the absence of MOH’s permission makes the product not yet able to enter supermarket, products can only be sold in certain places because it is guarded by the Civil Service Police, and lack of capital in business expansion

3. Rice-selling Business
   Advantages: the business is located in strategic location nearby the traditional market.
   Disadvantages: lack of capital is a main problem in business expansion and transportation cost is high for transporting products.

4. Tetelan Homemade Noodles Business
   Advantages: the product has the good taste that attracts many customers
   Disadvantages: lack of capital in business expansion and the business location is less strategic because it is not in the main street.

5. Savings and Loan Business
   Advantages: the business is located in the downtown and the business owner establishes cooperation with the hotels and tourism industry.

The advantages and disadvantages of cooperatives in Manado:

**Advantage:** the business has received funding support from the government and the building facilities is good.

**Disadvantage:** unprofessional business management remains a problem to the business

3.3 **The Roles of Micro, Small and Medium Enterprises**

In many developed countries, micro, small and medium enterprises are very prominent in the development of the market economy. These enterprises could provide new jobs and serve as the heart of the market economy as well as the basic chain of growth and economic development of society (Afshar Jahushahi Asghar, et al, 2011). These enterprises are also the most dynamic sector of the economic industry in India (Nalla Bala Kalyan Kumar and Sardar Gulgoth, 2012).

The development of small enterprises and credits in Bangladesh has the effect of reducing poverty and unemployment on the country’s social and economic development (Mahbubul Alam Chowdury and Kazuhiro Miyagi, 2006). Government policy has an important role in the growth of micro, small and medium enterprises in India, especially for the purpose of opening more jobs for the society (Afshar Jahushahi Asghar, et al, 2011).

Education and training have a very positive effect with the success of micro and small enterprises in Nairobi, Kenya (Michael Brown, Makarius Morara and Samuel Murlithi, 2009). Small and medium enterprises also have an important role in the development of the country because the success of these enterprises contribute significantly to the development aspects (Javed Mahmood Jasra, et al, 2011).

Small and micro enterprises have the key role in improving family welfare. Its role in improving productivity is crucial for the sustainability of future generations. It also involves the increasing socio-economic development for rural communities, including jobs, services, commodity, product distribution and production of rural products (Paul Aondona Angahar, 2012).

Improvements of micro and small enterprises affects changes to macroeconomic activities, state policies and project activities (Donald C. Mead and Carl Liedholm, 1998).

These enterprises have the key role in the security and economic resilience of developing countries, contributing significantly to the Indian economy regarding the production of industrial, export, employment and basic structure of the enterprises (Sardas Gulgoth and Nalla Kalyan Kumar, 2011).

Small and medium enterprises have differences in business activities and it is the representation of the business activities itself (Esuh Osai, Igwe Lucky and Adebayo Isalah Olusegum, 2012).

The best business strategy for micro and small enterprises is the need to develop for the growth of poor areas such as promotional activities by policy makers, donors and entrepreneurs (John Mark Obura, Evance Olhieng Abeka and Almadi Obere, 2012).
There are still many small and medium enterprises that have not been registered yet. The prospect of business development for economic growth is quite good (Navem Gadwal, 2011). Women also have an important role in the economic development of many countries from year to year. Women’s participation as labor continues to increase. Most Asian women hold the key position in the private sector, government and business ventures. The development of Asian women entrepreneurs make is a part of world development, as well as a potential factor in women’s empowerment in bringing changes in the modernization of society (Dil Parir and Shohit Hussain, 2012).

Management factors affect the performance of micro, small and medium enterprises resulting in different outcomes in each of the enterprises (W.I. Njanja, Rene Pelissier and Martin Ogutu, 2012).

The majority of small enterprises in developing countries never use less labor in their business development (Simeon Nichter and Lara Goldmark, 2009).

IV. CONCLUSION

4.1 The development of micro, small, medium enterprises and cooperatives can be done in order to increase the profit and the prosperity of the people.

4.2 The empowerment of micro, small, medium enterprises and cooperatives to create employment and empowerment of workers and women is an important factor in economic development, increasing public incomes and increasing business profits.

4.3 The income earned from micro, small, medium enterprises and cooperatives outweigh the financing subject which resulting entrepreneurs to get more profits in running the enterprises.
